QUESTIONS TO SIT WITH

Part 3: What Does Economic Progress Actually Mean?

October 22, 2026

1. Did needing to do the job twice mean we made more economic progress?

2. So, can we simply say we should build everything to last as long as possible?

3. But if the economy is a tool, and monetary activity isn't necessarily the same thing as value, what exactly are we working so hard to increase?

There are no right answers here. Just honest ones.
